

## Laboratory work Nr. 7

### Task 7 (easy)

1. Do some research and present the list of open source software used for office work (documents, spreadsheets, presentations), image editing, sound editing, video editing, programming. Provide short description of software and type of license used with that software.
2. From the list of presented software choose one application for document, one for spreadsheet, one for presentation creation, one for image editing. Reason your choice regarding these applications.
3. Prepare the report (.pdf), using one of the open source applications.
4. Upload the report to Your github/gitlab repository and inform me via e-mail.
